The first page of Geo St. Louis appears, the top blue bar has five search functions.

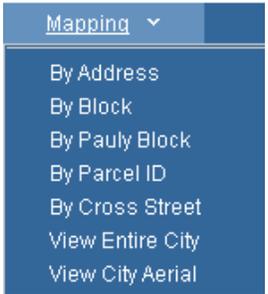

Geo St. Louis 
a guide to geospatial data about the City of St. Louis

Wednesday, May 12, 2010
3:36:58 PM

These five primary search functions listed within the blue horizontal header at the top of **Geo St. Louis** home screen also includes the City Departmental login function. From left to right they read:

- [Home](#)
- [Mapping](#)
- [Parcel Data](#)
- [Images \(Collection of JPEG picture, ongoing additions\)](#)
- [Data](#)
- [Log In \(You need a password to access this secure function\).](#)

The “Home”  function has no pull down menu on its’ right side.

The “Mapping”  function has seven selectable search functions that can be selected to limit your query.

The “Parcel Data”  function has four selectable search functions.

The “Images”  function has six selectable search functions.

The “Data”  function has ten selectable search functions.

Below you will find images of each search function's first page:

A brief explanation of the seven selections found on the left side under the “**Common Items**” feature on the

first page of “**Home**” is explained in detail in this tutorial. The five primary search functions in the top blue horizontal header may have similar and additional unique queries under

on the left side of their individual first page/screen:

Parcel Data by Address under ‘Common Items’: selecting this option you will see the following data entry window.

If you select “Address” under ‘Find Parcel By’ the data entry window remains constant.

Enter the address and street name to search for; you also have access to a selectable pull down window as you type the street name under ‘Street’, multiple alphabetic selectable names will appear, click **Find** or press the “Enter key” and the “**General Information**” page is displayed. See pages 12 thru 15 for detail information.

Find parcel by “Map”:

If you do not know the address, block number or parcel ID of the location of interest, the “**Find Parcel by Map**” function can be selected. After selecting this search function, the following page is display.

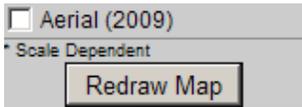

Select the “**Zoom In**” Zoom In Re-Center button on top of the map image and zoom in on the location of interest using the map as your guide. There are four additional navigational buttons on top of the map image. The next four buttons after “Zoom In” Zoom In Re-Center Zoom Out Highlight Select are somewhat self explanatory.

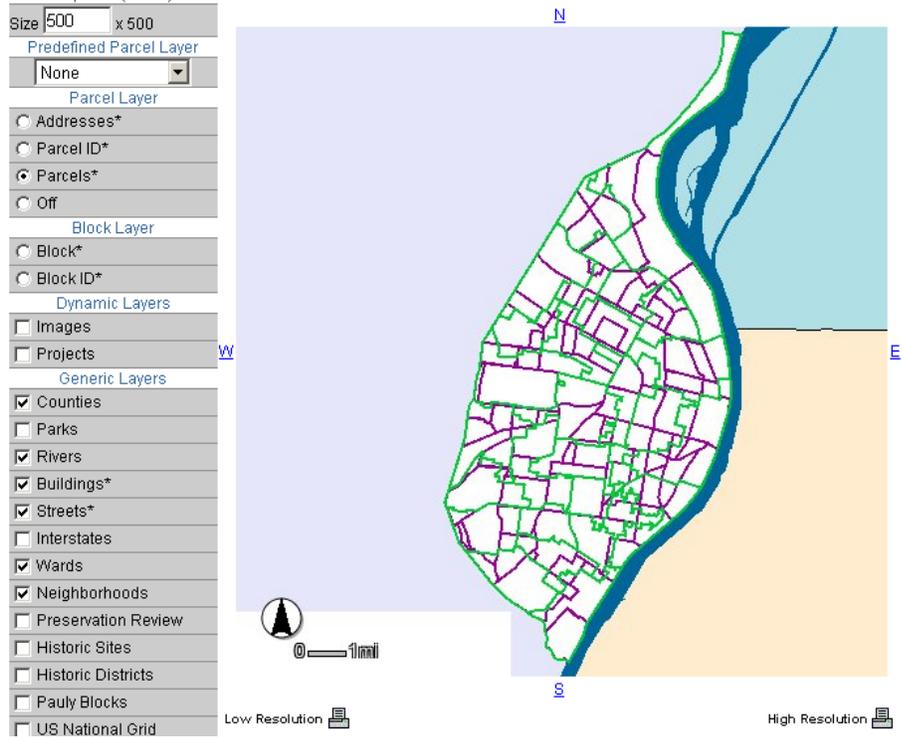

After you have “Zoomed” into the area of interest; the “**Select**” Select button can be used to choose a

parcel  and display its’ **General Information** page.

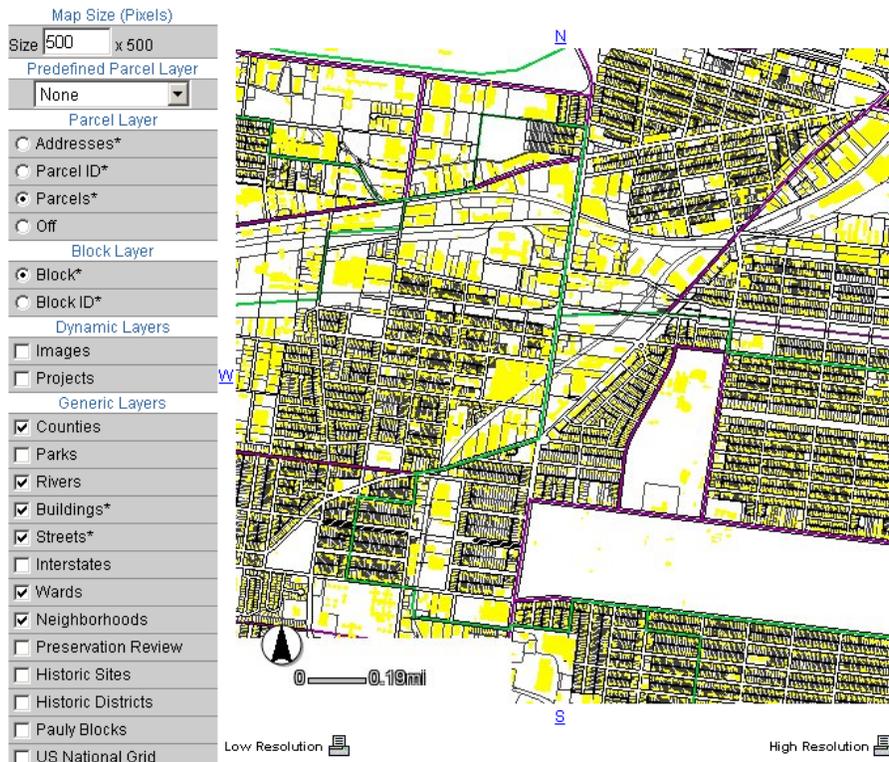

On the left side of the “**Find Parcel by Map**” page, additional thematic layers, features and boundaries can be added or deactivated by using its’ check box. Wards Neighborhoods Zip Codes

The **“Redraw Map”** button found below the left column **“must”** be clicked to activate the selected layers and/or see layer changes.

As you **“Zoom In”**  on the above map on your monitor, additional features become visible and are available for viewing. See example below:

The General Information page:

The **General Information** page has multiple query and search capabilities relative to both data and additional mapping features. You will find this page linked to the five search functions found under the “**Common Items**” in the left column on page one of Geo St. Louis web site.

Below the five primary search functions in the blue horizontal bar, you will see two graphic images with multiple selectable tabs below each image. On the right side of each image there are six navigational symbols.

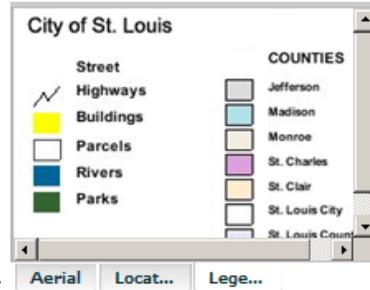

Home Mapping Parcel Data Images Data Log In

Parcel Land U... Zoning Aerial Locat... Lege...

The left image represents the default “**Parcel Layer**”, associated building footprints and their addresses. The parcels on this layer are selectable, clicking on a parcel will high-light that parcel and display its’ **General Information** page. The cursor will turn to a “**cross hair**” during the selection process.

Below this image are three selectable tabs ; **Parcel, Land Use & Zoning.**

Parcel Legend is selected under the right “Aerial Photo” image:

Selecting the “**Land Use**” tab you will see:

Land Use Legend is selected under the right “Aerial Photo” image:

Selecting the “**Zoning**” tab you will see:

Zoning Legend is selected under the right “Aerial Photo” image:

When the Land Use or Zoning screen is visible, clicking on the image will reselect a different parcel and default back to the “Parcel” layer with its’ associated General Parcel Information dataset.

The right image is the default “Aerial Photo Layer” representing the aerial image for the left Parcel Layer.

Below this image are three selectable tabs: **Aerial, Locator & Legend.**

The “Aerial” tab is the default with the selected parcel outlined:

Selecting the “Locator” tab you will see: a City map has the selected location centered and identified with a red star.

As identified on the previous page, selecting the “**Legend**” tab you will see the associated legends for the Parcel layer, Land Use & the Zoning layer. When selecting between these three tabs, you will need to select the “Aerial” tap to refresh the photo image and then re-select the “**Legend**” tab.

On the right side of the Parcel Map and Aerial Photo there are “**six navigational symbols**”:

- + - Enlarges the image.**
- - Reduces the image.**
- ↑ - Navigates up (North)**
- ↓ - Navigates down (South)**
- - Navigates right (East)**
- ← - Navigates left (West)**

These navigational tools only affect the image they are associated with within each image box.

Below the Parcel Map & Aerial Photo images you see the following:

405301350 is the parcel I.D. number - "Records 1 to 1 of 1" means there is only one tax record associated with this Parcel. Where a "Condo" or "Townhouse" is located on a Single Parcel, multiple "records" may be associated with a single parcel. Example follows of 1 to 6 of 6 records.

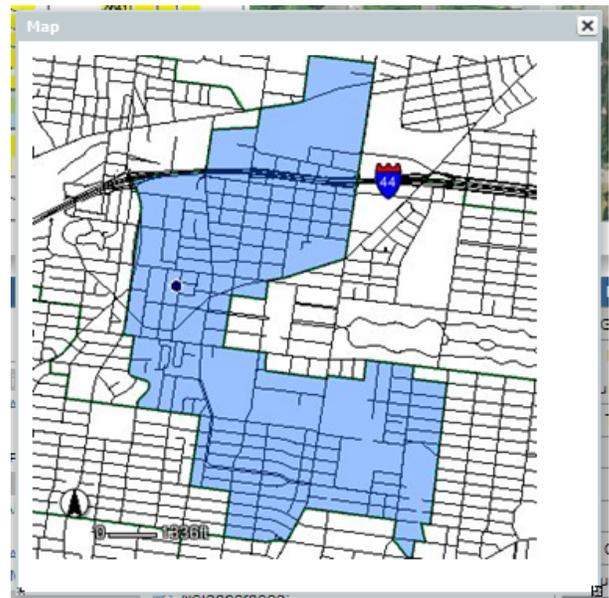

Under the "General Information" header you will find detailed information related to the selected parcel.

In the right column within this section is the "Geographical Information" table that is related to this parcel.

Geographical Information	
Ward:	10
Precinct:	2
Census Block:	1131.2003

Census:

The above window appears when initially clicking on “**Census**” and data displayed in the center represents “**Demographics**” within a one mile radius of the selected address/location. Three graphic windows on the top of the page displays the radius selected, additional potential radius possibilities and bar chart depicting the selected data set.

In the right column you have additional menu boxes, “**Census Variables**” and “**Indicator Highlights**”.

Census Variables	
Block Group	Demographics
Tract	Income
1 Mile	Housing
2 Miles	Education
3 Miles	Employment
4 Miles	Expenditure
5 Miles	
10 Miles	

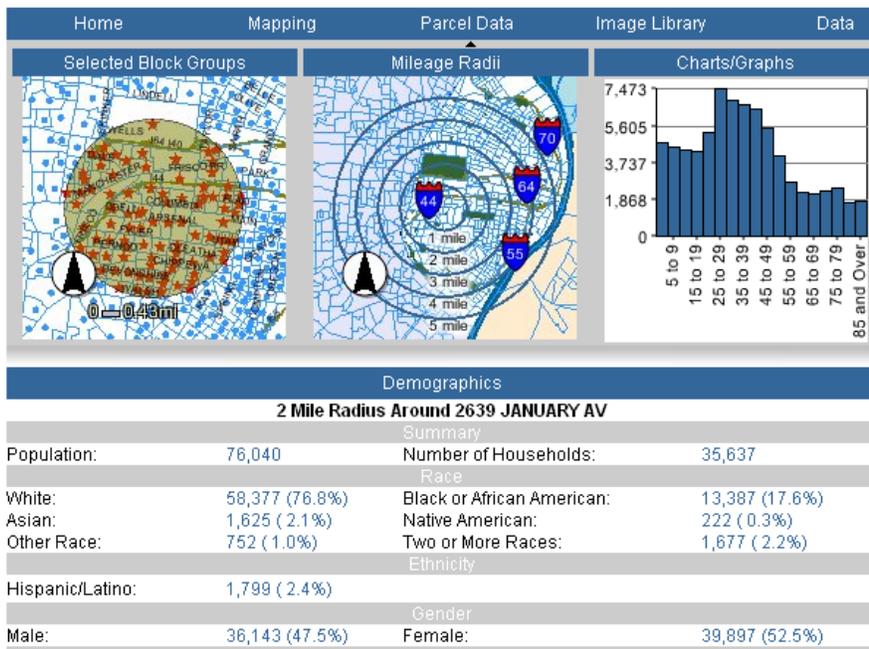

Indicator Highlights	
Demographics	
Consumer Expenditure	

- Block Group
- Tract
- 1 Mile
- 2 Miles
- 3 Miles
- 4 Miles
- 5 Miles
- 10 Miles

First select a area query from the first column **“2 Mile”**; the page will refresh automatically. Block Group and Tract are not functional at this time.

- Demographics
- Income
- Housing
- Education
- Employment
- Expenditure

Then select one of the six data variables , the following information is displayed:

At this time, under **“Census Variables”**, you have thirty six possible selectable data features to display.

- Indicator Highlights
- Demographics
- Consumer Expenditure

In this same column you have the menu box, **“Indicator Highlights”**.

Depending on which one is selected; **“Demographic”** or **“Consumer Expenditures”**, the following three-mile radius report is generated around the previous entered address.

Demographic Indicator Highlights			
2639 JANUARY AV

Design Your Own Map under ‘**Common Items**’: selecting this option you will see the following.

Map St. Louis

Map Size: px. width x height

Block ID: * Optional
(Seperate multiple blocks with commas ie. 2332,2333)

The “**Map St. Louis**” has two data entry boxes; the first box, “Map Size” determines the visual/scaled size of the map, **500 px** is the default. Entering a higher number renders a larger scaled map; a smaller number is the opposite. The “Block ID” or ID’s entered will be high-lighted after you click to render the map.

The left column has additional thematic layers, boundaries and identifier tools that can be turned on and off as required. The button found below the column “**must**” be clicked to activate the

- National Historic District
- Certified Local Historic
- Uncertified Local Historic
- Aerial

* Scale Dependent

Low Resolution

selected layers and/or see layer changes.

In the middle and top of the page you will find five buttons as depicted below.

The first three are fairly self explanatory. The fourth button “ Parcel Info ” allows you to select a parcel or an adjacent parcel, displaying its” General Parcel Information page..

The “ Draw ” button is your drawing option and a brief overview follows:

Selecting the “ Draw ” button allows the user to interact and design small presentation maps that can be copied into Word documents and/or a Power Point presentation. The “Drawing Layer” menu located in the right column is the user’s toolbox.

Drawing Layer

Text	Size	Rotation	Point Loc.
<input type="text"/>	10	0	Bottom

By selecting various options, the user can create typical exhibits shown below:

To add fills, patterns and outlines – the Draw button under “Map” and the Parcel Select Block Select under “Drawing Layer” must be selected.

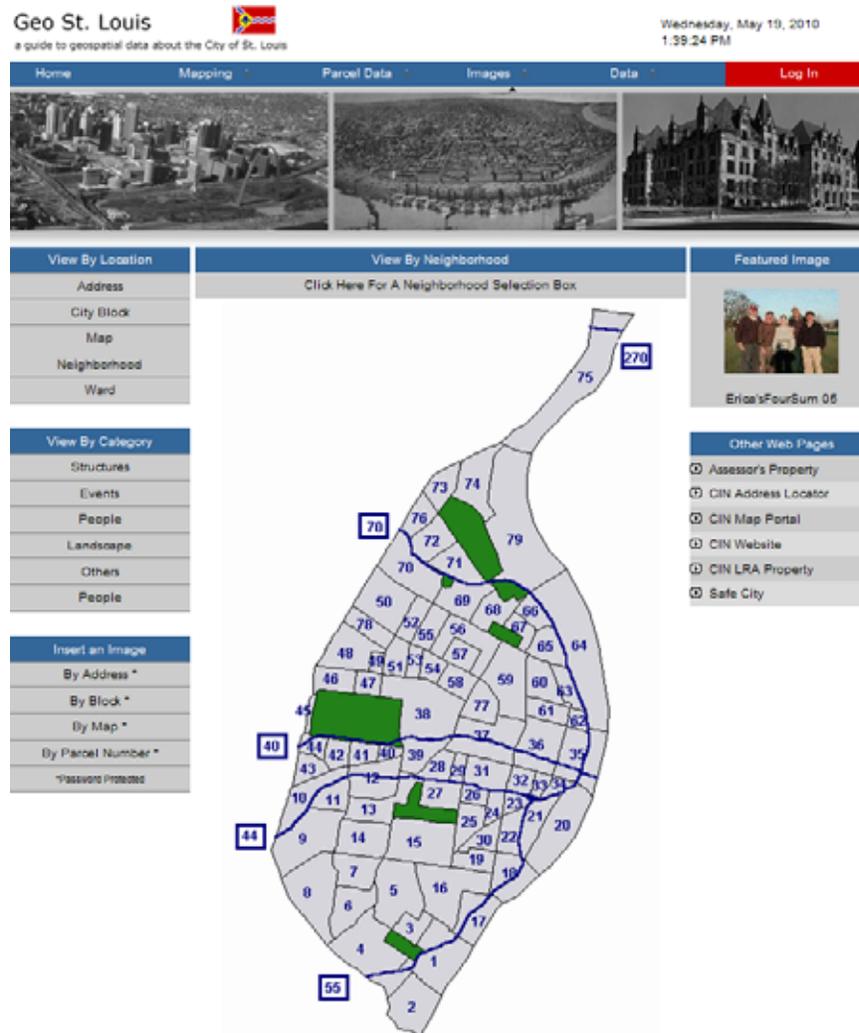

Adding text to selected locations, the button under “Text” must be selected.

To erase annotation or graphic enhancements not wanted and/or changes, use the “Back arrow button” in your browser window.

Images by Neighborhood under ‘**Common Items**’: selecting this option you will see the following:

As you can see, the user has multiple categories to choose from, search tools and a map to query from. You must have an “I.D. and Pass Word” to add photos to the image data base. City Departments are encouraged to contact the Geo St. Louis administrator; Tony Meyers Jr. at 622-3400 – ext 376 to sign-up and add images. Presently this page is not fully functional but will be in the future.

All images, text and page contents found on Geo St. Louis can easily be captured in a JPEG/JIFF format and copied into a Word or PowerPoint document, enhancing individuals’ presentation ability.

This tutorial briefly explains Geo St. Louis and does not cover every display function and/or analytical data query possibility available within this Web Site.

For additional information, to report a problem regarding displayed information and/or have additional data additions and/or associated concerns with site and its’ design features.

Contact Tony Meyers Jr. 622-3400 – ext 376 or Tony Meyers Sr. – 259-3477.
